

Mauro Piasere

CHIEF OPERATING OFFICER
ROBOTICS AND INDUSTRIALIZED
SOLUTIONS

Born in 1967, Mauro Piasere holds a degree in Aeronautic Aerodynamics from the Politecnico di Milano.

He has over 25 years of experience in the energy industry shaping organizations, nurturing competences and delivering results with a sustainable long-term view.

He started his career in 1994 as project offshore engineering for European Marine Contractors Ltd and in 1997 joined Saipem as Project Manager. He spent ten years in Southeast Asia becoming Area Operations Manager and taking the responsibility of execution of a 600 million euro project portfolio. In 2008 he assumed the role of Vice President New Naval Initiatives delivering ten new naval assets for both Drilling and Offshore, an investment effort of almost 2B€, which was concluded with the delivery of the new Saipem pipelay vessel Castorone.

In 2013 became President and CEO of Saipem America with the overall area responsibility of acquisition and execution of projects in the North and Central Americas.

In 2016 he's nominated Chief Operating Officer of XSIGHT with the overall responsibility to create and manage a new division for early engaging clients in engineering and consultancy services obtaining the award of important Front End Engineering Studies for major Oil & Gas Companies that lead to over 1B€ of EPCI acquisitions. During the same period, he has the responsibility of Innovation and Digital transformation at Saipem Group level developing and executing the digital agenda and roadmap of Saipem Digital Transformation at Group level.

He is now Chief Operating Officer of the new Robotics and Industrialized Solutions Business Line with the overall responsibility of executing Saipem strategy in the Energy Transition, Decarbonization and Renewable Energies.
